

### Results Entry

Laboratory:

Scheme: **UK NEQAS Faecal parasites (molecular)**

Distribution: **4833**

Dispatch date: **04-01-2021**

Return results: **25-01-2021**

Status: **NOT submitted**

Page: [Info](#) [Methods](#) [Spec:6188](#) [Spec:6189](#) [Final Page](#) [Blank form](#)

Examine for faecal parasite nucleic acid (Cryptosporidium sp., Giardia intestinalis and Entamoeba histolytica ONLY)

	<b>Specimen : 6188</b>
Faecal molecular report by method 1	<input checked="" type="radio"/> Not Examined <input type="radio"/> Cryptosporidium parvum <input type="radio"/> Entamoeba histolytica <input type="radio"/> Giardia intestinalis <input type="radio"/> Negative <input type="radio"/> Indeterminate Result
Faecal molecular detection method 1	<input checked="" type="radio"/> Not Examined <input type="radio"/> PCR-RFLP <input type="radio"/> Sequencing <input type="radio"/> PCR: Single target <input type="radio"/> PCR: Nested <input type="radio"/> PCR: Multiplex <input type="radio"/> Real-Time Single target <input type="radio"/> Ridagene <input type="radio"/> Sersep: EntericBio <input type="radio"/> Other
Faecal molecular extraction	<input checked="" type="radio"/> Not Examined <input type="radio"/> MagnaPur <input type="radio"/> NucliSENS easy MAG <input type="radio"/> Other <input type="radio"/> Qiagen:QIA symphony <input type="radio"/> Qiagen: silica column
CT result by method 1	<input type="text"/>
CT result by method 2	<input type="text"/>
Parasite density by method 1	<input type="text"/>
Parasite density by method 2	<input type="text"/>
