Schemes Available

Bacteriology

AAFB Microscopy
Antimicrobial susceptibility
Clostridium difficile
Community Medicine
Faecal pathogens
General bacteriology
Genital pathogens
MRSA screening
Mycobacterium culture
Superficial infections
Syphilis serology
Throat infections

Molecular

CMV DNA quantification
HBV DNA quantification
Hepatitis C RNA detection
HIV1 RNA quantification
Molecular detection of *C. trachomatis*
Molecular detection of human papillomavirus
Molecular detection of mycobacteria
Molecular detection of viruses in CSF

Mycology

Mycology culture
Antifungal susceptibility

Parasitology

Blood parasitology
Faecal parasitology
Parasite serology
Toxoplasma serology
Toxoplasma IgM serology

Parasitology Teaching Scheme

Blood programme
Faecal programme

Virology

Anti-HBs detection
Blood borne viruses
Diagnostic serology (exanthem screen)
Diagnostic serology (hepatitis screen)
Hepatitis B serology
Hepatitis C serology
HIV serology
Immunity screen
Rubella IgG serology
Virus identification
