Acknowledgements

We thank members of the Steering Committee, the Antibiotic Susceptibility Specialist Advisory Group, the Virology Specialist Advisory Group, and the National External Quality Assurance Advisory Panel for Microbiology, who all provided advice and support to the Organiser.

Our distributors in various countries deserve special mention for their collaboration in providing a service to participants throughout the year.

We particularly thank all laboratories that assisted in a variety of ways to ensure a continuous service. This help is invaluable to us and it would be impossible to run the Service without such co-operation.

Strains and clinical material

- Dr R Mulla and staff at the Luton and Dunstable Microbiology Department for providing sputa and urine and allowing staff to collect commensal organisms.
- St Mary's Hospital, Microbiology Department, London for allowing staff to collect commensal organisms.
- Staff at the Mycobacterium Reference Unit, PHS Cardiff, for supplying material, strains and confirmatory testing.

Provision and testing of isolates for the Bacteriology schemes

- Ms V Hall, Anaerobe Reference Laboratory, PHS Cardiff, who provided and characterised anaerobe strains.
- Colleagues in the Respiratory and Systemic Infection Laboratory, Laboratory of Healthcare Associated Infections, Sexually Transmitted Bacterial Reference Laboratory and the Laboratory of Enteric Pathogens, Cfl, who provided and characterised bacterial strains.
- Dr A Kearns and colleagues, HPA Staphylococcus Reference Laboratory.
- Professor M Wilcox, Leeds Teaching Hospitals NHS Trust for his expert advice for the *Clostridium difficile* scheme
- Dr H Malnick for expert advice on the suitability of bacteriology specimens prior to distribution.

Antimicrobial Susceptibility scheme

- Dr D Brown for his expert advice.
- Dr T Winstanley, Royal Hallamshire Hospital, Sheffield and Ms J Andrews, Antimicrobial Chemotherapy Laboratory, City Hospital, Birmingham and colleagues in the HPA, Antibiotic Resistance Monitoring and Reference Laboratory assisted with the confirmatory testing.

Mycology scheme

- Dr E Johnson, HPA Bristol for the provision of expert advice and characterised strains.
- Dr C Moore, Regional Mycology Laboratory, Manchester for antifungal susceptibility.

UK NEQAS for Microbiology PO Box 63003, NW9 1GH

Virology and Bacterial Serology schemes

- HPA laboratories in Bristol (Dr D Carrington), Southampton (Mrs S Mason), Newcastle (Dr M Valappil), Birmingham (Dr E.G Smith) for performing tests for various virology and bacterial serology schemes.
- Departments based at HPA Centre for Infection (Cfi): Virus Reference Division (Dr John Parry, Pam Litton and Heather Lawson) and the Laboratory of Hospital Acquired Infection (Ilka McCormick-Smith).
- Dr L Hesketh, Royal Preston Hospital, for characterisation of specimens for rubella IgM detection
- Dr R Anderson and Ms M Bentley from the National Institute of Biological Standards and Controls for calibration of sera for hepatitis B surface antigen detection and rubella IgG respectively.
- Colleagues at the Royal Infirmary, Edinburgh and The Royal Free Hospital, London, for characterisation of Erythrovirus B19 (parvovirus) and EBV/Rubella IgM serum specimens respectively.
- Colleagues at the Gloucester Royal Hospital for assaying specimens for HBsAg and other HB markers, anti-HIV, HAV, CMV, VZV and Rubella IgM using the bioMérieux Vidas.
- Colleagues at Bristol (Dr D Carrington); Newcastle (Dr M Valappil); Sheffield (Dr P M Zadik); Birmingham (Dr E.G Smith), and Manchester (Dr A J L Turner), who provide reference testing for Syphilis serology.
- Colleagues at St Georges Hospital, London for anti-HCV testing.
- The National Blood Service at Colindale for supplying human plasma and testing for blood borne viruses.
- Dr M Outlaw at the National Collection of Pathogenic Viruses for the supply of characterised virus isolates.

Molecular testing

- HPA laboratories in Birmingham (Dr E G Smith and Ms S Gardiner), Bristol (Dr D Carrington and Dr I B Vipond), Cambridge (Dr H Jalal), Manchester (Dr M Guiver) and Southampton (Mrs S Mason)
- Staff at University Hospital of Wales (Dr S Corden), Sheffield Teaching Hospital (Prof G Kudesia), London Teaching Hospitals of St Mary's (Dr D Muir), St Thomas' NHS Trust (Dr S O'Shea), Royal Free Hampstead NHS Trust (Dr G Clewley and Wendy Labbett), University College Hospital (Mr S Rice), Royal Infirmary of Edinburgh (Dr S M Burns) and University Hospital of Aintree (Dr M Rothburn).
- Departments based at HPA Centre for Infection (Cfi): Applied and Functional Genomics Unit (AFGU), Dr C Arnold and Dr L Cross, for confirmatory testing for mycobacteria by molecular method. Virus Reference Department (VRD), Dr S Beddows, for HPV reference testing
- Collaboration with the Scottish HPV Reference Laboratory (SHPVRL), Prof H Cubie and Dr C Moore, for providing material and reference testing for the HPV detection scheme.

Parasitology distributions and the associated teaching schemes

- Dr P Chiodini, Mrs M Manser and Ms H Edwards at the Hospital for Tropical Diseases (HTD), London for the organisation of these schemes
- PHS at Swansea (Dr E Guy), and the Microbiology Departments at Raigmore Hospital (Dr D Ho-Yen) and St. George's Hospital, Tooting (Dr R Holliman) for their active collaboration in the toxoplasma serology distributions also organised at HTD.
