

Acknowledgements

2018-2019

We thank members of the Steering Committee, the Antibiotic Susceptibility Specialist Advisory Group, the Virology Specialist Advisory Group, and the National External Quality Assessment Advisory Panel for Microbiology, who all provided advice and support to the Organisers.

Our distributors in various countries deserve special mention for their collaboration in providing a service to participants throughout the year.

We particularly thank all laboratories that assisted in a variety of ways to ensure a continuous service. This help is invaluable to us and it would be impossible to run the Service without such co-operation.

Bacteriology and Mycology schemes

Provision and testing of isolates for the Bacteriology schemes

- Dr T Morris and colleagues, Anaerobe Reference Laboratory, Public Health Wales Microbiology Cardiff, who provided and characterised anaerobe strains.
- Colleagues in Public Health England (PHE) National Infection Service: Gastrointestinal Bacteria Reference Unit (GBRU), Antimicrobial Resistance and Healthcare Associated Infections Reference Unit (AMRHAI) and Respiratory and Vaccine Preventable Bacteria Reference Unit (RVPBRU), the Sexually Transmitted Bacteria Reference Unit (STBRL), Staphylococcal Reference Unit, National Mycobacteria Reference Service (NMRS) Colindale and Dr Steve Gray, Meningococcal Reference Unit (MRU), Manchester for the supply of fully characterised strains, provision of confirmatory testing and provision of Legionella antigen positive urine.
- Dr P. Chadwick and staff of the Medical Microbiology dept., Pathology at Wigan & Salford Salford Royal NHS Foundation Trust, for the provision of commensal organisms
- Colleagues of the Medical Microbiology dept., Healthcare Service Laboratory (HSL), London the City Hospital, Birmingham and Northumbria NHS Foundation trust for provision of clinical material positive for pneumococcal antigen.
- Dr R. Howe (Chair - Antimicrobial Susceptibility Testing Specialist Advisory Group) for his expert advice for the antimicrobial susceptibility scheme.
- Ms E Matuschek and staff at the EUCAST Reference Laboratory, Dr M Wootton and staff at the Specialist Antimicrobial Chemotherapy Unit, National Public Health Wales, Cardiff, and colleagues in AMRHAI, PHE Colindale who assisted with the confirmatory testing of antimicrobial susceptibility.

Mycology schemes

- Dr E Johnson, Mycology Reference Laboratory (MRL), PHE Bristol for the provision of expert advice and characterised strains.
- Dr C Moore, Mycology Reference Centre, Manchester for confirmatory testing of antifungal susceptibility.

Serology schemes

- PHE National Infection Service laboratories in Bristol (Dr M Donati), Southampton (Dr G Underhill), Birmingham (Dr E G Smith) and Manchester (Mr D Ellis) for performing tests for various virology and bacterial serology schemes.
- PHE-National Infection Service laboratories in Colindale: Virus Reference Division (Dr K Brown, and H Lawson); Antimicrobial Resistance and Healthcare Associated Infections reference unit (Prof Neil Woodford)
- Dr D Orr, Royal Preston Hospital, for characterisation of specimens for Rubella IgM and Rubella IgG avidity. Dr S Schepelmann from the National Institute of Biological Standards and Controls for testing sera for Rubella IgG by Single Radial Haemolysis.
- Colleagues at the Royal Infirmary, Edinburgh (Dr K Templeton and K Gatti) and The Royal Free Hospital (G Clewley), London, for characterisation of Parvovirus B19, HBV, HCV, HIV and CMV/EBV/Rubella IgM serum specimens..
- Colleagues at the Gloucester Royal Hospital (A Cattle) for testing specimens for HBV, HIV, HAV, CMV, EBV and Rubella markers.
- Colleagues at Bristol (Dr M Donati); Sheffield (Dr D Whittaker and Dr L Prtak); Birmingham (Dr E G Smith), and Manchester (Mr D Ellis and Dr M Guiver), who provide reference testing for Syphilis serology.
- J Balogun at St George's Hospital, London for HCV Ag and HCV antibody testing.
- The NHS Blood and Transplant (I will find out who is the contact person now), Colindale, for supplying human plasma and testing for anti-HBs antibody.

Molecular schemes

- PHE National Infection Service laboratories in Birmingham (Dr E G Smith), Bristol (Dr I B Vipond and Dr M Donati), Cambridge (Dr L Ryall and S Parmar), Manchester (Dr M Guiver and R Abbott) and Southampton (Dr G Underhill).
- Colleagues at University Hospital of Wales (Dr S Corden), Sheffield Teaching Hospital (Prof G Kudesia), Charing Cross Hospital, London (Dr D Muir), St Thomas' NHS Trust (Dr S O'Shea), Royal Free Hampstead NHS Trust (Dr G Clewley and W Labbett), University College Hospital (Dr P Grant, Mr J Waite), Royal Infirmary of Edinburgh (Dr K Templeton and K Gatti), Cardiff Dept. of Medical Microbiology (S Corden) and Gloucester Royal Hospital (A Cattle), Liverpool Hospital (I Robinson).
- PHE National Infection Service laboratories in Colindale: Virus Reference Department (Dr S Beddows). We would like to thank for Dr S Beddows for HPV reference testing and typing.
- Collaboration with the Scottish HPV Reference Laboratory (SHPVRL), Dr K Cuschieri and Dr C Moore, for providing material and reference testing for the Molecular detection of HPV scheme.
- Special thanks to P McIntyre for the provision of Norovirus and Adenovirus positive stool material.
- Dr J W McCauley and colleagues at WHO Collaborating Centre for Reference and Research on Influenza The Francis Crick Institute for providing Influenza strains for the Molecular detection of respiratory viruses scheme.
-
